Not the ideal connection apparently, but it works. Decide where you would like to mount the equalizer. The tape out is a fixed output before the volume control. To get started, head to eBay and perform a search for the item needed. Nor is there a pre-out stage. Some equalizers are designed for installation in your dash while others are designed for a remote location such as the trunk. The equalizer should always be between the receiver and the amplifier. An equalizer connected to a preamp allows the user to adjust the sound across a broad spectrum of audio frequencies to suit individual tastes, typically by setting individual slide controls on the equalizer. The black one is the ground wire. Turn on all three components and knobs according to your preferences. It would certainly work either way, if his receiver had those capabilities. They are available in a range of different prices and features, but all perform the same basic function: adjustment of the sound level at different frequencies. Graphic Equalizer hook-up Discussion in " started by. To hook up a graphic equalizer to such a unit, remove the plugs and connect one pair of audio cables to the pre-amp output and the other end into the left and right channel inputs on the rear panel of the graphic equalizer. Best rated Best when creating a list of 5-10 items ex: The Top 10 Mattresses for People with Back Problems. Graphic eq hook up the cables into the preamp inputs on your equalizer. Be sure all the wiring is pushed inside the dash beforehand. I kind of assumed that wasn't what you were trying to do, but that's kind of the obvious back-up method. Connect this cable either to the power cable attached to the receiver or to a 12V variable power source in the fuse box such as the wiper fuse. Do not mount your equalizer directly to the metal chassis. You will simply need to attach a few screws in order to mount your equalizer. Connect the other end to the "Tape Monitor" outputs on the rear of the receiver. If the wire follows this pattern then you have found the correct switched 12V power wire. Scott "There is no tape out. Connect the power cable.
